Overview

**Not a baccalaureate degree program*

ANA 113: Human Anatomy

Credits: 4
Type: LEC/LAB

Comprehensive course focused on the gross anatomy and histology of human tissues and major organ systems. Designed for health sciences majors, this is a rigorous course emphasizing clinically relevant anatomy. Lectures are supplemented by a laboratory component consisting of demonstrations of cadaveric specimens.

ANA 407: Gross Human Anatomy

Credits: 6
Type: LEC/LAB

Eight-week course for students in exercise science and occupational therapy only. Laboratories involve dissection of the human cadaver, emphasizing the musculoskeletal system. Lectures emphasize clinical correlations.

ANA 495: Supervised Teaching

Credits: 1-6
Type: TUT

Teaching assistant in anatomy courses.

ANA 499: Independent Study

Credits: 1-6
Type: TUT

Undergraduate project.
